Projects

Band4Band – Audio Visualizer

Voucher – Craigslist for Rentals

Nostalgic TV – Retro TV Experience

Capsule – Minimal Podcast App

Experience

Freelance Fullstack Developer
Meter Made LLC

Aug 2023/
Now

Currently leveraging the latest in AI/ML tools to offload the production software requirements for clients within the energy and robotics industries.

UI Engineer
SailPoint Technologies

Apr 2021/
Feb 2023

Led the development of various front-end engineering epics for a SaaS based Identity and Access Management system. Triaged UI related issues during engineering on-call rotation to help minimize customer impact and improve system reliability. Deployed daily features and bug fixes to discrete customers in production via in-house feature flag controlled CI/CD pipelines.

Software Developer Consultant
SurgeForward

Mar 2019/
May 2020

Worked closely with the development teams of client companies to help support their ongoing projects. Aided in the decision making of platform technologies and application architecture utilizing POCs and demos. Provided mentorship to junior engineers and colleagues by conducting pair-programming for development, testing, and debugging.

Software Developer
General Motors

Jun 2014/
Feb 2019

Helped build dealer and consumer facing applications for: inventory, fleet, case management, and vehicle inspection processing. Supported and maintained several legacy applications, with the additional task of transitioning many onto new and modern platforms. Conducted technical workshop events for interdepartmental teams across GM.

El Paso, TX,
USA

Tech Stack

Angular	Svelte
